

**ONE HUB FOR EVERY KIND OF AI WORK**

Every frontier model, expert agents and creative studios on one platform, built for Bangladesh

A large, stylized teal starburst or sunburst graphic is positioned in the top right corner of the slide. It consists of a central circle with numerous rectangular rays of varying lengths radiating outwards.

# 01

## The problem

What it actually costs to use AI from Bangladesh today.

# AI HERE IS EXPENSIVE, NARROW AND FOREIGN

## Behind a foreign card

A full stack costs past BDT 13,000, and checkout wants a foreign card

## One model per plan

You pay for one opinion and never see what another model would say

## Best features cost more

Long context, file work and speed sit behind the top tier

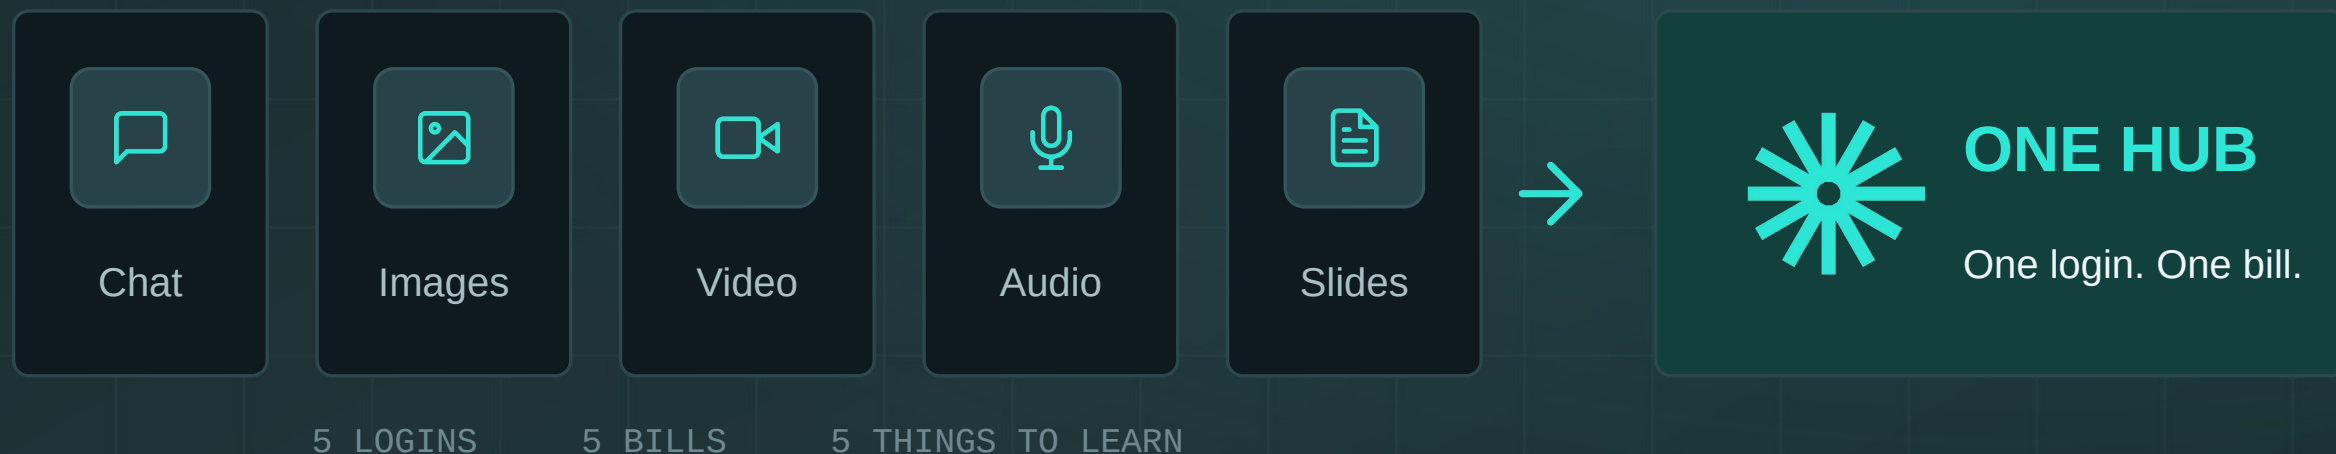

## Bangla ignored

Local context, documents and workflows go underserved

THE HIDDEN COST

# FIVE TOOLS. FIVE BILLS.

**Price wins the first sale.** Consolidation is what keeps the customer.

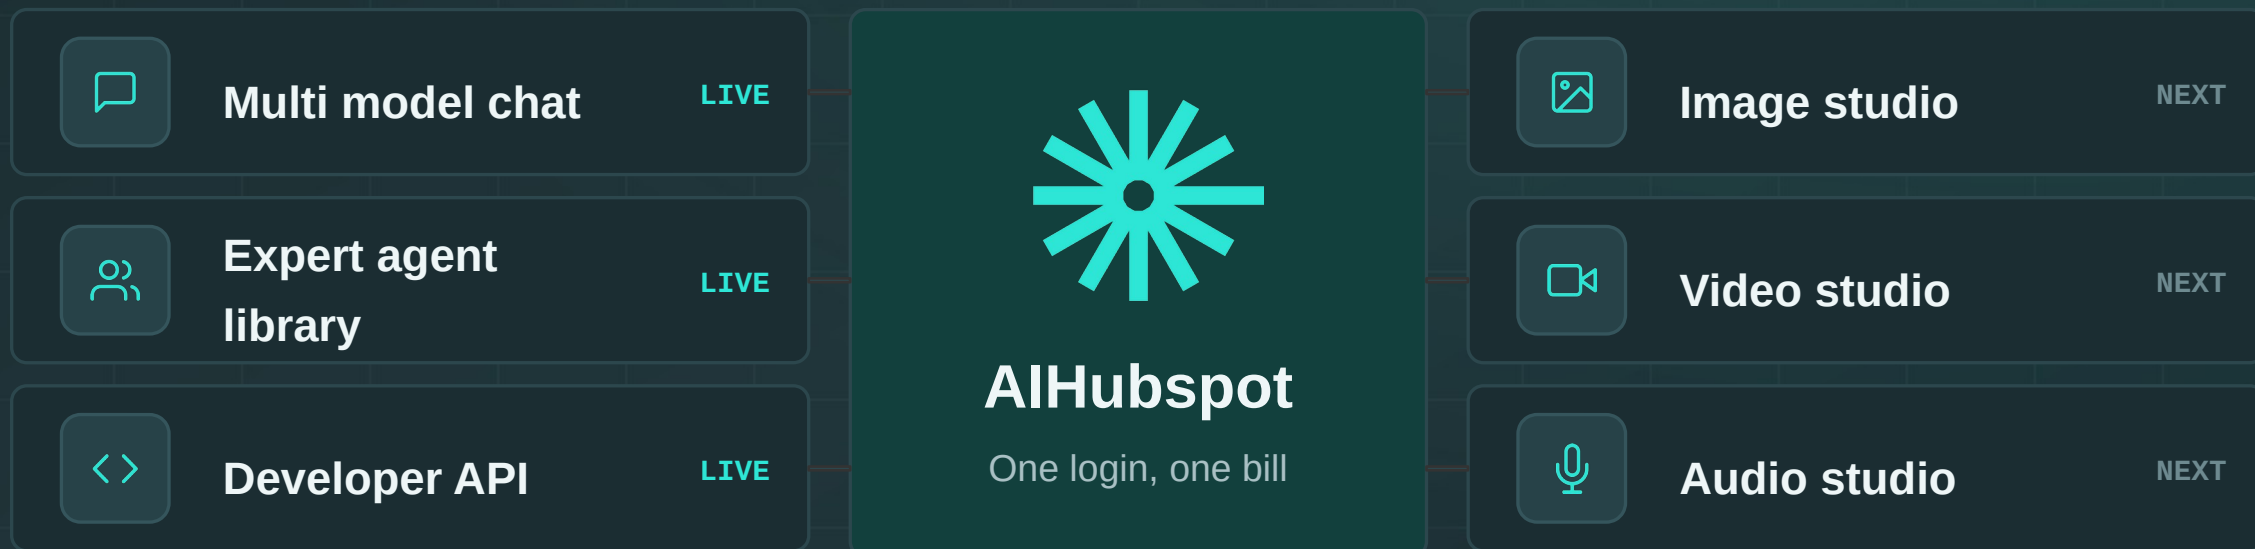

# 02

## The platform

One surface for chat, agents, studios and the API.

THE SOLUTION

# ONE PLATFORM. EVERY KIND OF AI WORK.

# HOW THE HUB IS BUILT

## SURFACES

Chat

Agents

Images

Video

Audio

Skills

API

## ROUTING LAYER

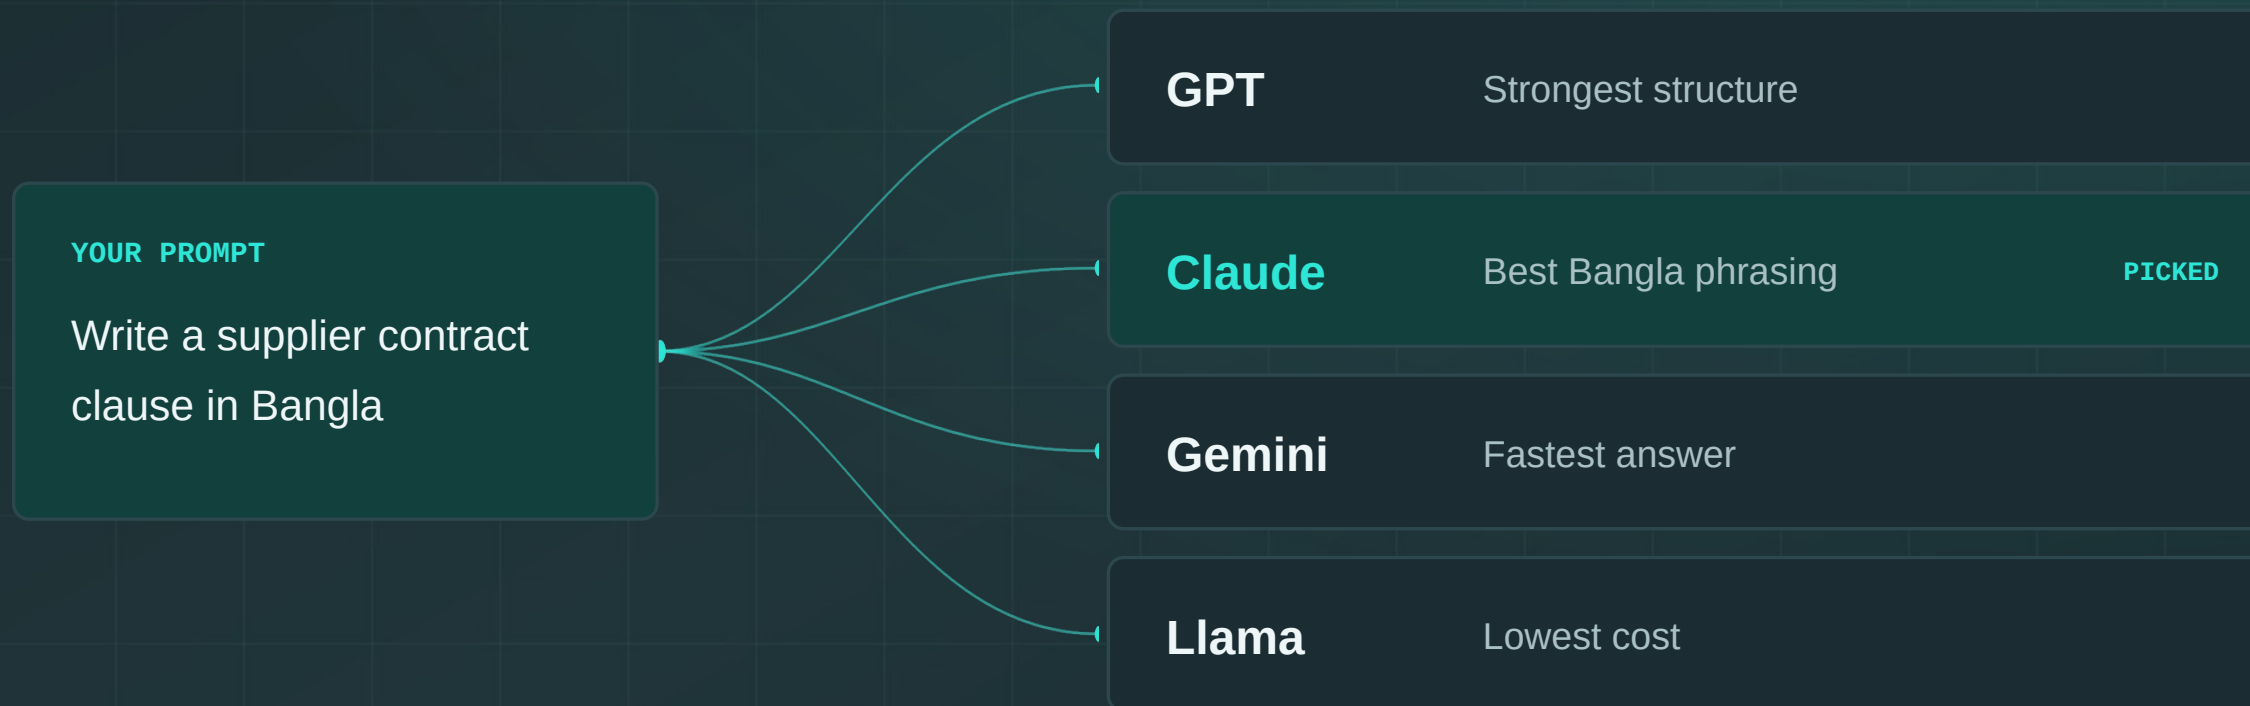

Model choice, prompt lift, failover, metering and spend control

## MODELS

Nine plus providers, with our own Bangla models underneath

# ONE PROMPT GOES TO EVERY MODEL AT ONCE

**Comparison is the product.** Ask once, read every answer side by side, and keep the one that actually holds up.

# PICK A MODEL YOURSELF, OR LET THE ROUTER PICK

## Manual choice

Name the model you trust and stay on it

## Auto router

Reads the task and sends it to the best fit

The right model  
for each task

Answers checked  
for quality

Lower cost on  
easy work

**It is also the margin.** Premium models are held for the tasks that need them, which is what keeps a flat plan profitable.

WHY PEOPLE STAY

# Comparison is the product.

Ask once, read every answer, and keep the one that holds up. No other product here lets you do that.

# AN EXPERT FOR WHATEVER YOU ARE WORKING ON

## Research analyst

Deep reading and sourced  
briefs

## Health guidance

Plain answers to everyday  
questions

## Personal coach

Training, habits and  
motivation

## Science research

Method, literature and  
study design

## Business and legal

Proposals, contracts,  
market notes

## Study tutor

Hard topics explained in  
Bangla

**100 plus agents and growing.** Each one arrives already briefed, so there is no prompting to learn.

# MINI APPS THAT FINISH THE WHOLE JOB

**Presentation  
builder**

**Grammar and  
Bangla check**

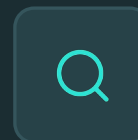

**Proposal and  
contract**

**CV and interview  
prep**

**Study planner**

**Market research**

**Nobody wants a model.** They want a finished deck, a clean CV, a proposal ready to send.

# IMAGE STUDIO

## INSIDE THE SAME PLAN

### Generate

Ads, products and social posts  
from a Bangla prompt

### Edit

Background, retouch and resize in  
the same window

### Brand kits

Reusable styles so output stays  
on brand

# VIDEO STUDIO

## AVATARS AND CLIPS

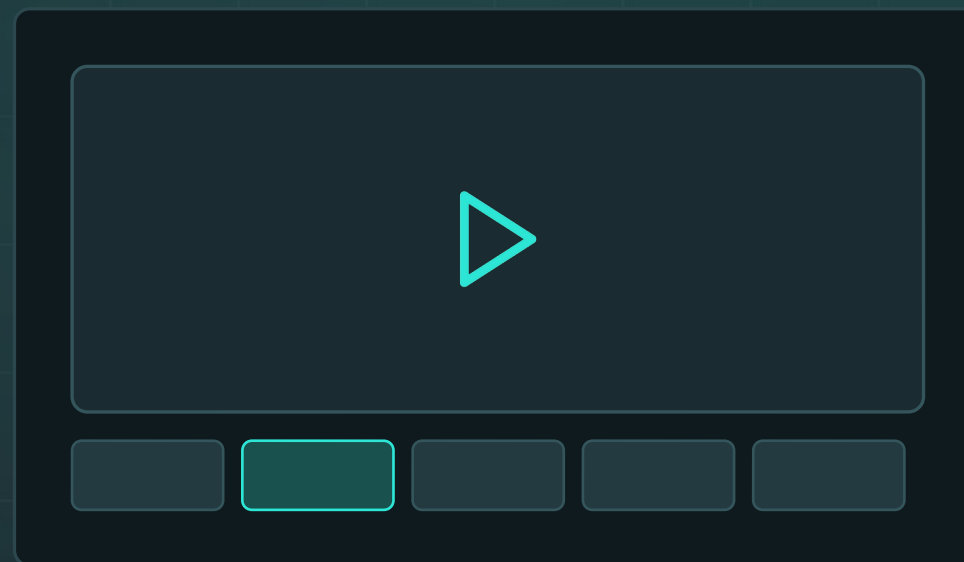

Presenter video from a script

Bangla captions, done for you

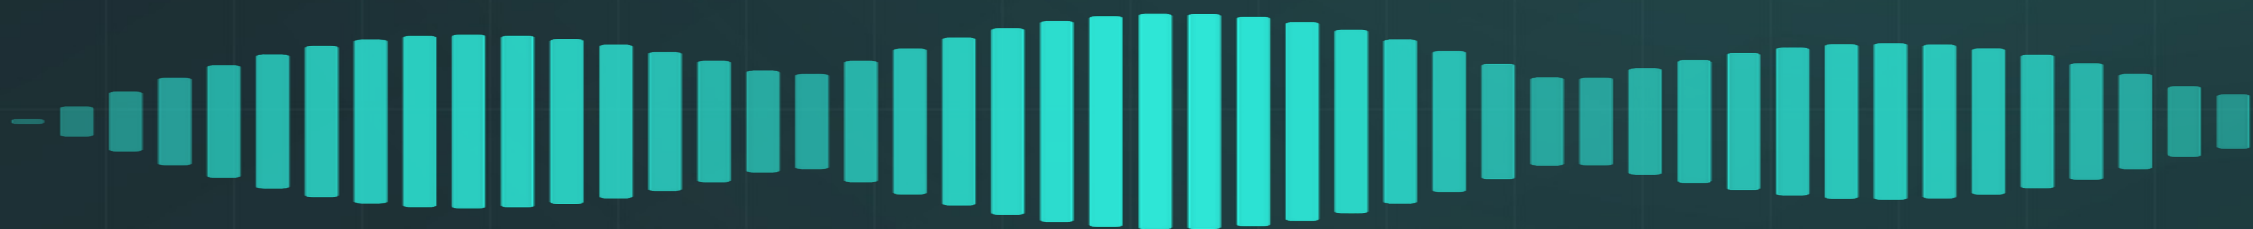

Timeline editing in the browser

**Shipped through a partner layer first.** The interface, the credits and the billing stay ours.

# AUDIO IS WHERE WE ARE HARDEST TO COPY

Speech and voice

Transcription

Music and sound

**Every global tool treats Bangla as a long tail.** We built the long tail, with SenseSpeech and Ekush underneath.

# 03

## The business

How the platform makes money and how usage is metered.

# ONE ENDPOINT. ZERO FRICTION.

## Automatic failover

Traffic reroutes when a provider drops

## One monthly invoice

Every provider on a single bill

## Edge routing

Lower latency for developers in Asia

INTEGRATION.TS

```
const client = new OpenAI({  
  baseUrl: "aihubspot.app/v1"  
});  
  
// one key, every provider  
model: "gpt-4o"  
fallback: "claude"
```

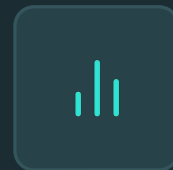

# FOR COMPANIES, CONTROL IS THE PRODUCT

**See every use**

**Set permissions**

**Track spend**

**Protect data**

One negotiated rate for the whole company, one console, and nothing leaving the building unseen.

ENTERPRISE

# Your team is already using AI nobody approved.

The enterprise plan gives that activity a floor and a window.

TRUST

# SOME DATA IS NEVER ALLOWED TO LEAVE

**Runs inside your building**

**Bangla models on premise**

**Audit and retention control**

**No global aggregator offers this here**

**For a bank this decides the deal.** It is the difference between a pilot and a no.

# BUY WHOLESALE. SELL ONE FLAT PLAN.

## Buy wholesale

Token rates across nine plus providers

## Sell flat

One local price, every model included

## Keep the spread

Most users stay inside their allowance

**Three revenue lines.** Consumer plans, developer gateway billing and enterprise contracts, all on one build.

## PRICING

# THREE PLANS IN TAKA

### STARTER

BDT

# 700

PER MONTH

Students and daily users

### PRO

BDT

# 2,000

PER MONTH

Freelancers and pros

### MAX

BDT

# 10,000

PER MONTH

Power users and teams

## ENTERPRISE

Aggregate seat pricing, admin console and local deployment, priced per company

## USAGE

# YOU ALWAYS KNOW HOW MUCH IS LEFT

### FOR PEOPLE

## Daily plus monthly

DAILY ALLOWANCE, RESETS EACH MORNING

MONTHLY POOL, PICKS UP THE HEAVY DAYS

### FOR DEVELOPERS

## Prepaid wallet

WALLET BALANCE

**BDT 500**

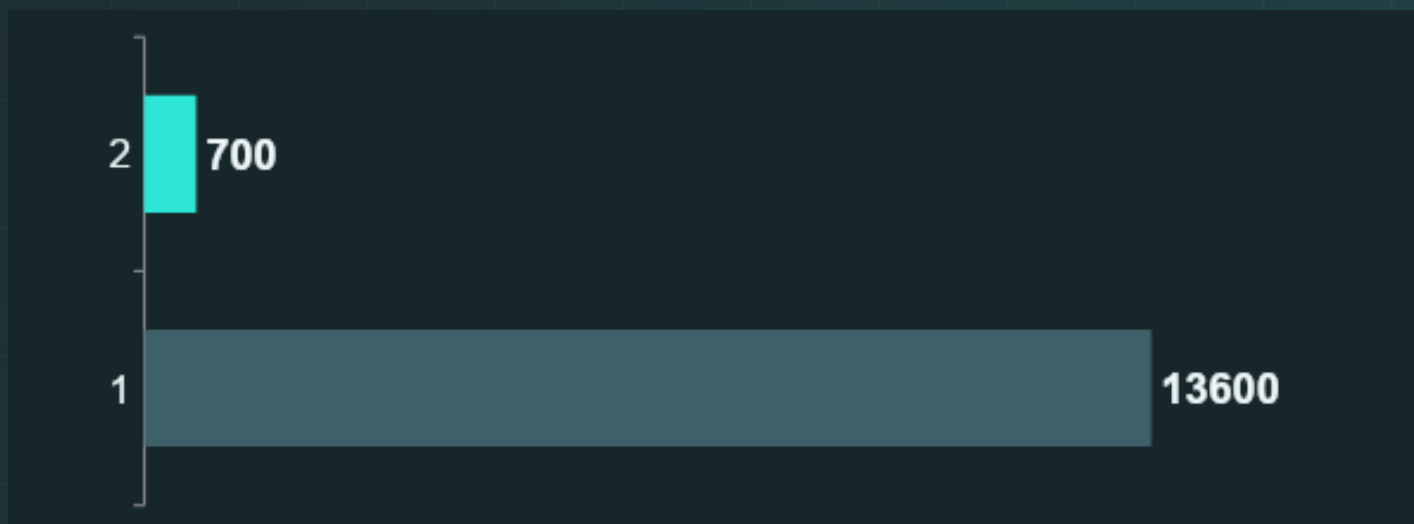

TOP UP

- ✓ Flat token rates, every model
- || Live spend, down to the call

**No surprise bills either way.** People watch a bar, developers watch a balance.

## THE SAVINGS

# ONE PLAN AGAINST A STACK OF SIX

# 95%

less than buying chat, image,  
video and audio tools one by  
one

Figures are approximate taka equivalents of global plans, before conversion and card fees.

# 04

## What is next

Where the demand is, what ships when, and how to start.

# THE DEMAND IS PROVEN

**170M**

People online

**240M**

Mobile wallets

**No.1**

Freelance workforce

## India already ran this play

AI Fiesta reached 3 million dollars of ARR in 36 hours and 20,000 paid users in three days.  
Bangladesh has the same gap and no local champion.

# WHAT SHIPS NEXT

## NOW

Chat, agents, router,  
API

## NEXT

Image studio, mini  
apps

## THEN

Video and audio  
studios

## AFTER

Local deployment,  
then new markets

# THREE WAYS TO BEGIN

## Try it free

Sign in and run one prompt across every model

## Book a demo

Thirty minutes on your own workflows

## Get API keys

Point your OpenAI code at our endpoint

[aihubspot.app](https://aihubspot.app)

Scan to open the hub

# AI FOR THE NEXT 170 MILLION

One hub for every kind of AI work, built in Dhaka, from BDT 700 a month.

**AIHUBSPOT . APP**

AN INTELSENSE AI PRODUCT
